Problem Solving

Adaptability

Time Management

MARWIN ABAQUIN

Full Stack Web Developer

Profile

As a fresh graduate student with three years of self-taught experience in web development, I've honed my skills in HTML5, JavaScript, PHP, MySQL, database design, and front-end development. Through self-directed learning, I've developed a strong foundation in building high-quality websites and identifying opportunities to enhance the user experience.

Work Experience

January 2024 – May 2024

ROC Digital Marketing and Services (Internship)

Full Stack Wordpress Developer

- Built and maintained custom WordPress themes and plugins using PHP, HTML, CSS, and JavaScript.
- Implemented responsive design and front-end development techniques to ensure optimal user experience across all devices
- Collaborated with designers, project managers, and clients to deliver high-quality and visually engaging WordPress websites
- Optimized website performance by implementing best practices in speed optimization, caching, and database management.
- Earned a certificate of leadership for leading a team in designing and developing webpages.

Education

June 2019 – May 2024

Bachelor of Science in Information Technology

City College Of Calamba

Thesis: San Agustin Parish Information Management System

- Designed and developed a local-hosted information management system using HTML, CSS, PHP, JavaScript, Bootstrap and Laravel Framework.
- Implemented Certificate issuance, Donation tracking, File Management, User Authentication and File Archiving to improve data management retrieval and security.
